Help protect archaeological sites and habitat for threatened and endangered species. DON’T CAMP OR BUILD FIRES IN ROCKSHELTERS OR ALONG THE CLIFFS.

NOTE: This map is not intended for use as a trail map. If you plan on hiking any of the longer trails, and if you are not familiar with the area, we suggest using trail maps showing topography. Maps can be obtained from the locations listed on the back of this brochure.

Natural Bridge State Resort Park, adjacent to Red River Gorge Geological Area, is administered by Kentucky Dept. of Parks. It offers lodge rooms, cabins, dining facilities, and two developed campgrounds. For more information, call the park at (606) 663-2214, or (800) 256-PARK (7275).

MC. T. COMBS MTN. PARKWAY

**WARNING**

DANGEROUS CLIFFS

A pass is required for parking overnight in the Gorge and Indian Creek Area (between the hours of 10 p.m. and 6 a.m.). Passes are available in local stores and at the District Office in Stanton.

The cliffs are beautiful, but they are also dangerous. Please be careful.
**REGULATIONS**

**Plants and Animals.** The Gorge supports an unusual array of plant and animal life. Geographic location, topography, and glacial history contribute to the diversity of the area. A number of endangered, threatened, sensitive, and rare species of plants and animals make the Gorge their home. The Forest Service and other agencies are working to protect these species and their habitats.

**Glade Historic Site.** The Gladie Cabin, a reconstructed log house, is the only structure in the Gorge that dates back to the late 1800’s. The Gladie Cultural-Environmental Learning Center is a U.S. Fee-Vacation Area. The Center provides trail, camping and other information. Maps, passes, books and souvenirs are available for purchase. The Center is open seven days a week during spring and end of October. Fees are charged for activities and guided trips.

**CLIFFLINE SAFETY**

**Dangerous Cliffs**

- Avoid camping near the edge of cliffs. You may be closer to the edge than you realize.
- Avoid getting too close to cliffs.
- Plan to arrive at your destination before dark.
- Avoid alcohol and other drugs.
- Avoid getting close to cliffs.
- Avoid foot travel after dark, stay in familiar areas and use a flashlight.
- Watch your footing when walking near cliffs.
- Trees and bushes can’t be trusted to hold you if you slip.
- Watch your children carefully, and keep them close to you at all times.
- Don’t let them run.

**WARNING**

Do not camp or build fires in rockshelters or along the cliffs.
