Dr. Ward Griffen  
Dr. John Hutton  
Dr. Roy Jarecky

Dr. Theodore Kotchen *minutes*  
Dr. Roger Lambson  
Dr. Frank Lemon  
Dr. Robert Lester  
Dr. Arnold Ludwig  
Dr. Yosh Maruyama  
Dr. Wendell Musser  
Dr. Jacqueline Noonan  
Dr. Mark Ravin  
Dr. Harold Rosenbaum  
Dr. Robert Straus  
Dr. Miroslava Winer  
Dr. Jonathan Wirtschafter  
Dr. Fred Zechman

The meeting was called to order by Dr. Clawson. The minutes of the January 4, 1977 meeting were approved as distributed.

Basic Science Graduate Program

The graduate program of the University of Kentucky and the University of Louisville are presently being reviewed by a committee of the Council on Public Higher Education. The purpose of the review is to determine the feasibility of maintaining present programs in both Colleges or authorizing only one of the Colleges to continue basic science graduate programs as a part of its curriculum. Officials of both schools have been invited to meet with Council members to discuss their respective programs and present documentation.

The Dean reviewed the financial implications of any actions which might be taken by the Council and expressed his views that a first class medical school could not continue to function without basic science graduate programs. There was general consensus with this opinion, but no official action was taken by the Chairmen's Council at this time.

Information for Prospective and New Faculty - Faculty Files

A memorandum, dated February 7, 1977 from the Vice President of the Medical Center, was distributed. Council members were asked to contact Mr. Parker if information should be desired.

Special Scientific Project Grants Program, The National Library of Medicine

The National Library of Medicine is offering grant support for scientists, practitioners and scholars who are seeking support for books on broad professional health interests. Additional information can be obtained from the Dean's Office.
