Professor William Wagner
Chairman
Privilege and Tenure Committee
Chemistry Department
207 Chemistry-Physics Building

Dear Bill:

Enclosed is a copy of a letter from President Singletary regarding the University's policy on termination of faculty appointments.

The Senate Council feels that the Senate Advisory Committee on Privilege and Tenure is the appropriate body to initiate a study of our regulations and make recommendations for consideration by the Senate in January.

The Council recognizes this as a most important undertaking and knows that you and your committee will make a significant contribution to its resolution. Or as the mbtion of the Council stated, we know that it is in good hands for ".....enlightened and timely action."

Sincerely yours,

J. R. Ogletree
Chairman
